

Solar Power at DW Mouldings Ltd

DW Mouldings continue their commitment to the environment, with the installation of 460no high performance 'Winaico' photovoltaic modules. With an estimated annual output of 106,605 kWh, it has reduced our demand for electricity from outside sources.

We continue to look at ways of reducing our carbon footprint and in October 2020 we signed up to 'Smartest Energy' which means we are now supplied with 100% renewable electricity.
