

Ecogate Green box Saves energy at DW Mouldings Ltd

DW Mouldings are always looking at ways to reduce their carbon footprint, and with the installation of the 'Ecogate Green Box' it has put us one step closer to our goal.

The Green Box was installed on our extraction system and it soon proved to have more advantages than we anticipated. By directing suction exactly where it's needed in real-time using intelligent controls, Ecogate systems use one-third the electricity of those traditional systems while making every other part of the system work better. Air quality, electricity use and noise levels are all improved.

Once installed we found our electricity consumption was reduced substantially, which is not only a welcome financial saving but also a large reduction of our Carbon Footprint.
